
tactical gear What about HAYWIRE Toys Tactical stuff??

I'm curious.....their gear looks pretty interesting: Some of it looks like 100% direct copies of Cotswold stuff, some of it looks like 100% copies of 21st Century molds, and then there's the Custom stuff..... Anyone know anything about them? Quite a bit of their gear would look mighty good on my SAS guys as extra equipment, like the 9mm drop-down tactical holster. Also its hard to deny that rocket launcher would look good on the 21st Century Uniforms... Anyone? Other good sources for tactical gear/uniforms? Brant
