
tactical vest bluebox delta commando, cant put on tactical vest, pls help, thks

Posted by 槍神 David - 2008/09/13 19:45

I'm sort of new into collecting figures. I purchased the Bluebox delta force commando& found the tactical vest does not have an open-end zipper for front closure, i have being trying for days but still cant figure out anyway to put the vest on the figure, i pulled down the zipper fully but its still not wide enough for the figure to go through, neither from the top with hands raised nor from the bottom with the boots removed. Any suggestion will be much appreciated. David Huang (Hong Kong)

Leave off his belt and gear, slide him feet first into the vest, sliding his arms into their holes. Slowly cinch the vest up over his shoulders. The back of the vest will be stressed, but if you go slow it will not tear
