
airsoft ammo Does Airsoft Ammo come in paint form??

Posted by sculder7 - 2008/09/13 20:05

Hello all...I am new to this group and to Airsoft. Does anyone know if Airsoft guns have ammo that allow you to shoot paint or is it just 6 mm plastic bb's. What other types of bb's can be shot in airsoft guns?

6mm paintballs? Not only would those not break, you couldn't see the splat either! =) Anyway.. no. it's just 6mm bb's...

6mm paintballs? Not only would those not break, you couldn't see the splat either! =) Anyway.. no. it's just 6mm bb's... They come in 6mm, but they're tiny tiny tiny, and a pain in the butt to get to break. ~Maverick Professional Dreamer for Hire Vulcan- P-68 SC by MXB Custom Roosevelt- Maverick w/ Turret Changer Check Out The PPIG(Last update June 3 1998) <http://members.aol.com/MaverickXB/PPIG/PPIG.html> PPIG-001 TOG-004 TSR-005 PHSOA-006 PGPOG-052

Yes, there are 6mm paintball BBs. However, it is extremely difficult to get a hold of them, and they are so 'strong' that you can literally squash them flat and not break them. I didn't know that Polar Ice was 6mm... heh heh heh -Al Foley Big Daddy AI -Team Infra Red, Captain.
