WANTED Thompson 1928 chicago typewriter airsoft Tommy Gun replica. I've never seen an airsoft thompson in any configuration other than the M1A1 configuration. If that configuration would be acceptable, they are affordable new at <http://www.sportsmansguide.com/net/cb/cb.aspx?a=394651&kwid=264746>

WANTED Thompson 1928 chicago typewriter airsoft Tommy Gun replica. # I've never seen an airsoft thompson in any configuration other than # the M1A1 configuration. If that configuration would be acceptable, # they are affordable new at # <http://www.sportsmansguide.com/net/cb/cb.aspx?a=394651&kwid=264746> There is an M1928 airsoft with drum, called the Chicago Typewriter, that was marketed by Cybergun S.A. (www.softairusa.com). It's no longer in their catalog, and an M1A1 is there in its place. So I guess that it is a discontinued product. The Chicago Typewriter is a completely manual airgun; you have to operate the bolt for each round. I have one, but I'm not parting with it...
