I just learned today that Performance Airsoft (www.performanceairsoft.com) is having a humongous clearance sale. They are selling UTG's for \$50! (thats the AEG I own) Thats a \$100 gun for half off! They are also selling high grades for dirt cheap. ICS MP5's for \$155 thats a \$230 dollar gun and up. And lastly TM's (Tokyo Marui's, thats the big leader of airsoft, but you know that) are also up there on clearance M14's are going for \$275 - thats a \$375-400 dollar gun. TM Sigs and G36's are also on sale for \$200. Please think about taking advantage of this sale. I have never seen anything like it and it probably wont happen again. Even buying a UTG would be great... and for \$50 you can't go wrong. Don't take too long, sales are going fast and they will be over soon. Later, Austin

austin, dude, i think i want a good sniper rifle. The way we play, thats the only thing that is gonna work. Mostly because we always start off hidden and in the woods sneaking around for almost an hour befor 1 shot is fired. So yeah, i think i would like to get a sniper rifle. Which one do you recomend? i don't think i want one like jacob's super 9, but a gun that has some really, and i mean really, good accuracy. A gun that wouldn't miss unless i was a bad shooter, so no overhopping or anything like that. It would be nice to have a magazine of some kind too, so that if it did get hot i wouldn't be screwed. I guess thats what 2 guns are for. Oh well, just tell me what you think. -Alex p.s. probably in the \$100 price range, anything more than that and i would just fix my car, or by 100s of shotgun shells, or get a stereo for my car or something _____ Do You Yahoo!?
