\*\*\*\*\* ARTICLE START \*\*\*\*\* Think You Are Ready?

If airsoft games are played in your school, chances are you have seen a lot of impressive weapons. You probably have watched a lot of firepower going around; but if you wish to join them, start scouting for the weapon you can afford. If you have swift feet, then you may want something you can lug around easily. If you think you are better off crouched behind bushes all day, then get your self and your friends airsoft sniper rifles.

Airsoft sniper rifles are lightweight, have simple clean lines, and are flexible. Airsoft sniper rifles are powered by springs. These will have to be cocked for each shot. So if you want to be ace sniper in the whole block you have to practice a lot to get that dexterity and speed without batting an eyelash.

What is an airsoft sniper rifle?

If you watch a lot of gun slinging movies, then you have seen how a sniper is used. The sniper sits for hours waiting for the target. He crouches in his hide-out, ever on the ready to pull the trigger. Through his scope he can position his sniper, and the bang!

Airsoft sniper rifles have full adjustable rear sight, a cheek piece on the left side, and a rubber recoil pad that provides shoulder support. It runs the length of 1140 mm and has a height of 200mm. The 2000g model has a capacity of five shells, and displays energy of 0.75 joules and a velocity of 200 FPS. It also has a caliber of 6 mm BB, and a silent bolt action.

Hiding behind \$100 UHC Super 9 airsoft sniper rifles can be stimulating. It gives you the advantage over your unsuspecting enemy. This sniper rifle is durable and does not need gas or batteries to operate. But if you are thinking of rounding up all your trophies in the battlefield, think again.

Airsoft sniper rifles are good pieces for back up support or to add to your collection of firearms. Since this uses a spring to propel a shot, you have to cock to the sniper to be ready at all times.

Unfortunately, this cannot go against the bigger and better airsoft weapons. In a war game nobody wants to risk defeat. So they arm themselves with the fast spitting, powerful guns.

---

## Making the Best Shot

But there is solution to this dilemma. Upgrade your team's airsoft sniper rifles. You can upgrade this yourself, and do it one at a time, depending on your budget. Having good airsoft sniper rifles is one thing, and being a good sniper is another thing.

To be a good sniper, practice with an appropriate gun that can give higher FPS shots. Use a gas gun, never mind if you have to lug the gas tanks. A gas gun is a better training tool than the electric version. As you practice with your gun, you will become familiar with its performance in different situations.

In other words, get to know how your gun fires. For accurate shots, learn the workings of the Mil-Dot formula. Once you master this, you can compute the distance of your target and prepare your aim accurately. Get a scope for better aim and a real good camouflage; you must never be espied as you are the ticket to your team's victory.

If you think you and your group are ready, get those airsoft sniper rifles. Get some protective gear like face masks and goggles. If you are below 18, then you have to wait until you are old enough for the exciting war games. You can also do some research on the airsoft laws in your state. By observing these rules you can avoid unnecessary trouble.

About The Author: The airsoft sniper rifles (<http://www.asktheairsoftexperts.com/2007/08/08/are-there-cheap-airsoft-sniper-rifles-in-the-market/>) can step up your game plan. But it pays to have a well-stocked chest of weapons; go to this site for the recent details on airsoft grenades (<http://www.asktheairsoftexperts.com/2007/08/08/is-there-really-an-airsoft-grenade/>), and get more ideas about airsoft pistols (<http://www.asktheairsoftexperts.com/2007/08/08/electric-airsoft-pistols-or-gas-airsoft-pistols/>) for more firepower.
