F.Y.I. Make sure you know exactly what you are getting into when you purchase replica guns from overseas. I bought a case of automatic rifles for use in our police vehicles from Korea and the entire shipment was seized by customs even after the vendor promised: (snip) ALWAYS let someone else import this stuff; there are several compnies in the US who deal in AirSoft and they'll ship to you from within the US and without any Customes hassles at all. Viper USA is good; they have a lot of their stock on display at The Supply Seargent chain in SoCal. A silenced MP-5 in combat config runs about \$80 retail; if you need a case of them you could probably get them wholesale from: Viper USA PO Box 9826 Fountain Valley, CA 92728 (just happened to have a flyer handy) A web search will turn up a lot of other companies and distributors; a lot of them eem to be in Canada, but there are other US-based ones as well.
